ReactJs CreateClass is not a function

Asked 2 years, 11 months ago · Active 1 year, 3 months ago · Viewed 82k times

53

```
var React = require('react');
module.exports = React.createClass({
  render: function() {
    return (
      <div>
        <h1> the list </h1>
      </div>
    );
  }
});
```

When I run the above code I get the following error :

```
app.js:4 Uncaught TypeError: React.createClass is not
```

Is this because of a version difference or a typo ?

package.json-I have included create-react-class as

Participant Code:

```
import React from 'react';
import logo from './logo.svg';
import './App.css';

var buttonStyle = {
  margin: '10px 10px 10px 0'
};

var Button = React.createClass({
  render: function () {
    return (
      <button
        className="btn btn-default"
        style={buttonStyle}
        onClick={this.props.handleClick}
      >
        {this.props.children}
      </button>
    );
  }
});

function App() {
  return (
    <div className="App">
      <header className="App-header">
        <img src={logo} className="App-logo" alt="logo" />
        Edit <code>src/App.js</code>
      </header>
      <a
        className="App-link"
        href="https://reactjs.org/"
        target="_blank"
        rel="noopener noreferrer"
      >
        Learn React
      </a>
    </div>
  );
}
```
